

Urine S. G. Refractometer MASTER-URC/N $\alpha$ 

The MASTER-URC/N $\alpha$  is designed to quickly and easily measure Urine Specific Gravity with just a single drop of sample. The new plastic body design is resistant against corrosion from salty and acidic samples, and incorporates an improved optics system for higher contrast and better clarity. Simple to use, lightweight, and portable! It is featuring a water resistant design and Automatic Temperature Compensation.

#### Specifications

Model	MASTER-URC/N $\alpha$
Cat.No.	2791
Range	Urine S.G. scale : 1.000 to 1.050 Refractive index scale (nD) : 1.333 to 1.356
Minimum Scale	Urine S.G. scale : 0.001 Refractive index scale (nD) : 0.001
Accuracy	Urine S.G. scale : $\pm 0.001$ Refractive index scale (nD) : $\pm 0.0005$ (10 to 30°C)

#### Options

- Daylight plate : RE-2315-61M
- \* Calibration Certificate : Contact an ATAGO representative for details.
- Daylight plate for small volume samplings : RE-2391-67M
